Marcus Young

TECHNICAL SKILLS

Confluence | Jira | Javascript | Node | React | Angular | jQuery | MySQL
Express | MongoDB/Mongoose | HTML | CSS | Bootstrap | Vue | Python | PHP | Redis
NGINX | Sqlite | Sequelize | AWS | EC2 | S3 | Cloundfront | Route 53 | Git
Trello | Redux | Redis | Mocha | Chai | Artillery | PostgreSQL | GraphQL
Material UI

EXPERIENCE

Vin2 — *Full Stack Software Engineer / Project Manager*

February 2022 - November 2022

- Commenced the development of a full stack web application leveraging React, Node.js, MySQL and AWS from inception
- Assembled, directed, and collaborated with a software development team
- Leveraged Jira and Confluence to decrease scope creep and track project progress
- Conducted weekly sprint reviews and daily QA checks on code committed by the development team

Mosaic Learning — *Full Stack Software Engineer*

January 2021 - February 2022

- Engaged in collaborative efforts with a cross-functional team of 10+ engineers to design, construct, and sustain numerous front-end services utilizing diverse frameworks such as EmberJS, ReactJS, and Moodle
- Implemented a responsive design utilizing Bootstrap and Material UI to develop the login page for the Learning Management System (LMS)
- Architected and implemented a REST API to facilitate the procedural aspects of generating, personalizing, and finalizing quiz content

Hack Reactor@Galvanize — *Associate Instructor of Software Engineering*

February 2020 - December 2020

- Mentored and educated over 40 students on CS fundamentals and building modern full stack applications
- Performed code reviews and debugging sessions with emphasis on engineering best practices
- Collaborated with fellow instructors to provide one on one support for struggling students

EDUCATION

Hack Reactor — *Advanced Software Engineering Immersive*

April 2019 - January 2020

Clackamas Community College — *Computer Engineering*

2015 - 2018
